

KENN ROBIE LAIGO

This task took me **3 - 5 hours** to finish.

I had challenges in the part of not first having a container from each section not everything, but some and had trouble finding the assets for the bootstrap assets. I solved this by asking for help from others and also had a small trouble on the part of the search bar because I could not center it, but after some time I figured it out, and it took me long because I really wanted to learn how I could solve a problem without getting help first.
